Investment Strategy

The fund invests in the most promising small- and medium-size companies in Europe. Based on a consistent bottom-up [A] approach, we select companies which are leading players in their specific market niche and hold a considerable market share therein. These quality titles often feature outstanding returns. Investing in the small- and mid-cap area means to operate in information inefficient markets that are not exhausted and thus offer a variety of opportunities. Ethical, as well as environmental, social and governance (ESG) criteria are applied in the implementation of the strategy.

Chances

- Promising upside potential of European small and mid caps without compromising the consideration of ESG criteria.
- Participation in fundamental and technical events of individual stocks.
- You can benefit from the deep network that our fund managers foster with small and mid caps of our investment universe.
- The investment process enhances the security selection and ensures permanent monitoring of risks.
- You can benefit from information advantages that arise from the lower analyst coverage of small and mid caps.

Risk / Return Indicator [8]

‹ Typically lower yield — Typically higher yield ›

1	2	3	4	**5**	6	7

‹ Lower risk — Higher risk ›

In addition to the general risks detailed in the Sales Prospectus, the volatility risk on the European stock market is of special importance.

The Lupus alpha Smaller Pan European Champions C fund is classified in category 5 because its unit price typically fluctuates rather strongly and therefore both risks of loss and chances of gains can be correspondingly rather high.

For detailed information on opportunities and risks, please refer to the current Sales Prospectus.

Risks

- **Risk of price changes:**
  Experience shows that equities are subject to sharp price fluctuations and thus the risk of price declines. These fluctuations are particularly impacted by the earnings development of the issuing company as well as sector trends and overall economic development.
- **Concentration risk:**
  If investment is concentrated on particular assets or markets, the fund becomes particularly heavily dependent on the performance of these assets or markets.
- **Liquidity risk:**
  If securities are traded in a relatively narrow market segment, it can be difficult to resell them in situations where there is insufficient liquidity.
- **Operational risk:**
  The fund can become the victim of fraud, criminal acts or errors by company employees or external third parties. Finally, management of the fund can be negatively impacted by external events such as fires, natural disasters or similar.
- **Market risk:**
  The performance of financial products depends on the development of the capital markets.
- **Currency risk:**
  Changes in exchange rates can affect the price of fund shares.

Legal Notice

[1] Source: Lupus alpha; gross performance (BVI method): The gross performance considers all costs incurred at Fund level (e. g. management fee) and assumes reinvestment of any distributions. Costs incurred at customer level such as sales charge and securities account costs are not included. Unless otherwise specified, all indicated performance data show the gross performance. Please note: Past per-formance is not a reliable indicator for future performance.

[2] Source: Lupus alpha; the net performance assumes a model calculation based on an invested amount of EUR 1,000, the maximum sales charge and a redemption charge (see master data). It does not include individual costs of the investor, such as a securities account fee. (To this effect, please refer to the price list of your securities account provider.) Please note: Past performance is not a reliable indicator for future performance.

[3] Volatility is the range of variation of a security price or index around its mean value over a fixed period of time. A security is regarded as volatile if its price fluctuates heavily.
The tracking error describes the standard deviation (volatility) between the Fund's performance and the performance of the benchmark index. The higher the tracking error, the more the performance of the Fund deviates from the performance of the benchmark index.
The investment ratio means the part of the Fund that is not invested in cash.
Sharpe Ratio: Sharpe Ratio is the excess return (Fund performance less money market rate) in relation to the range of variation (volatility) and shows the yield of the Fund per risk unit. The higher the Sharpe Ratio, the more yield has been generated in relation to the risk incurred.
Maximum drawdown: The maximum drawdown is the largest percentage drop in value in a given period of time. It measures the amount the fund falls from its highest point to its lowest point in the selected timeframe.

[4] The initial sales charge is the difference between the sales price and the unit value. The sales charge varies depending on the type of the Fund and the distribution channel and usually covers advisory and distribution costs. The Distributor will demand the sales charge at its own discretion.

[5] The management fee is the fee for managing the Fund and taken from the Fund's assets; it is paid to Lupus alpha for the management and administration of the Fund.

[6] The performance fee is a performance-related remuneration depending on the performance or the achievement of specific objectives such as a better performance compared to a benchmark. The costs may also be levied if a pre-defined minimum performance has been achieved.

[7] Distributing Funds do not reinvest the generated income, they pay out the income to the investor.

[8] The presentation shows the summary risk indicator (SRI) of the Fund's Key Information Document (KID) and does not include all possible risks. Funds are subject to market-related price fluctuations which may result in losses up to the total loss of the invested capital. For additional risks and detailed information on the summary risk indicator, please refer to the current Key Information Document. You may retrieve the Key Information Document and the current Sales Prospectus from our website at www.lupusalpha.de.

[A] Bottom-up investing is an investment approach that focuses on the analysis of individual stocks and deemphasizes the significance of economic cycles and market cycles. In bottom-up investing, the investor focuses his attention on a specific company, rather than on the industry in which that company operates or on the economy as a whole.

[S] The fund promotes environmental and/or social features but does not target sustainable investments. It is classified as a product in accordance with Article 8 of Regulation (EU) 2019/2088 on sustainability-related disclosure requirements in the financial services sector ("SFDR").

[S1] For further information on the ESG methodology applied by the fund, please refer to the current prospectus.

[S2] Both internal analysis and externally generated research is used during the investment process. External data are used to support the decision-making process. ESG-related data are largely provided by MSCI. These data are utilized in ESG filters, ESG rating and when analyzing controversies (https://www.msci.com/legal/sustainability-and-climate-resources-and-disclosures).

[S3] For the carbon footprint according to Annex I of the Regulatory Technical Standards supplementing Regulation (EU) 2019/2088, the CO2 emissions of each company in the portfolio are converted and added up according to the share that an investor holds in each company's enterprise value. The resulting emissions are then divided by the value of the current invested fund assets (in € million). For the CO2 intensity, the CO2 emissions of each company in the portfolio are set in relation to the company's sales. The portfolio-weighted average of this ratio is then calculated. The data refer to the part of the benchmark or fund for which the corresponding data are available. The MSCI ESG Climate Change Metrics form the basis: https://www.msci.com/our-solutions/esg-investing/climate-solutions/climate-data-metrics

[S4] A controversy is categorized as „very severe" according to the definition of MSCI. Companies with very severe controversies that are considered resolved are not necessarily excluded.

[S5] The OECD Guidelines for Multinational Enterprises on Responsible Business Conduct provide recommendations from governments to multinational companies (https://mneguidelines.oecd.org/mneguidelines/).

Certain information contained herein (the "Information") is sourced from/copyright of MSCI Inc., MSCI Solutions LLC, or their affiliates ("MSCI"), or information providers (together the "MSCI Parties") and may have been used to calculate scores, signals, or other indicators. The Information provided is for internal use only and may not be reproduced or disseminated in whole or part without prior written permission. The Information may not be used for, nor does it constitute, an offer to buy or sell, or a promotion or recommendation of, any security, financial instrument or product, trading strategy, or index, nor should it be taken as an indication or guarantee of any future performance. For regulatory disclosures mandated under the EU ESG Rating Activities Regulation (Regulation (EU) 2024/3005), please visit www.msci.com/legal/sustainability-and-climate-resources-and-disclosures for methodology and organizational disclosures and https://one.msci.com for rating level disclosures. The Information is provided "as is" and the user assumes the entire risk of any use it may make or permit to be made of the Information. No MSCI Party warrants or guarantees the originality, accuracy and/or completeness of the Information and each expressly disclaims all express or implied warranties. No MSCI Party shall have any liability for any errors or omissions in connection with any Information herein, or any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

The Capital Management Company may also invest for the Fund more than 35% of the Fund's assets in debt obligations, note loans and money market instruments of one or several issuers (please refer to Section "Investment Limits for Public Issuers" in the Sales Prospectus).
