What is this product?

Type

The fund is a UCITS investment fund issued in Germany.

This document refers to unit class C of the Lupus alpha Volatility Risk-Premium. New unit classes may be formed at any time. However, the rights of investors who have purchased units in existing unit classes will remain.

Term

The fund has an indefinite term. The company is entitled to terminate the management of the fund subject to a notice period of six months by way of an announcement in the Federal Gazette and furthermore in its annual or half-yearly report. Information on redemption options can be found in the section "How long should I hold the investment and can I withdraw money prematurely?"

Objectives

The fund management aims to generate an absolute, positive return that is independent of developments on the equity and bond markets (absolute return concept). The fund is actively managed within the framework of its objectives and does not follow any benchmark index.

Intended retail investor

The UCITS fund is aimed at private and professional clients as well as eligible counterparties seeking general wealth creation/optimisation with a medium to long-term investment horizon of more than 3 years. This UCITS fund is a product for investors with some basic knowledge of and experience in financial products. Such investors can bear losses (up to the complete loss of the capital invested) and do not attach any importance to capital protection.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. In very adverse market conditions, it is possible that the ability to execute your redemption request may be impaired.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period : 3 years			
Investment EUR10,000 Scenarios		If you exit after 1 year	If you exit after 3 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	3,240 EUR	4,500 EUR
	Average return each year	-67.6%	-23.4%
Unfavourable	What you might get back after costs	7,680 EUR	8,000 EUR
	Average return each year	-23.2%	-7.2%
Moderate	What you might get back after costs	9,860 EUR	10,390 EUR
	Average return each year	-1.4%	1.3%
Favourable	What you might get back after costs	11,680 EUR	11,280 EUR
	Average return each year	16.8%	4.1%

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between 03/2017 and 03/2020.

The moderate scenario occurred for an investment between 11/2016 and 11/2019.

The favourable scenario occurred for an investment between 12/2014 and 12/2017.

What happens if Lupus alpha Investment GmbH is unable to pay out?

The failure of the company will have no direct effect on your redemption, as the statutory regulation provides that in the event of the insolvency of the financial investment management company, the investment fund will not become part of the assets of the insolvency estate, but will be administered independently.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs EUR	560 EUR	930 EUR
Annual cost impact (*)	5.6%	3.1% per year

(*)This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.4% before costs and 1.3% after costs.

Composition of Costs
