### Activity report for the period: 01/01/2024- 31/12/2024

#### Investment objectives and investment policy to achieve the objectives:

The fund pursues an absolute return approach, which aims to outperform a money market rate (ESTR). An options strategy is used to trade the volatility of short-term options. The Lupus alpha Volatility Risk Premium captures the spread between implied and realised volatility (volatility risk premium) on the global equity markets.

Details of environmental and/or social characteristics according to Regulation (EU) 2020/852 of the European Parliament and of the Council can be found in the appendix of this annual report.

The main sources of income from disposals during the reporting period were gains on options and futures.

#### Portfolio structure and significant changes during the reporting period:

#### Structure of the fund:

	31/12/2024	% quota	31/12/2023	% quota
Fixed interest securities	101,396,679.76	95.80	92,974,127.42	97.91
Futures	-246,230.31	-0.24	571,136.41	0.60
Options	-135,735.58	-0.11	-54,929.56	-0.06
Cash at banks, money market instruments and money market funds	4,559,459.97	4.31	2,136,700.90	2.25
Other assets	767,529.38	0.72	435,964.02	0.45
Other liabilities	-514,476.30	-0.48	-1,101,134.33	-1.15
Fund assets	105,827,226.92	100.00	94,961,864.86	100.00

#### Performance:

The previous financial year 2023 ended on 29/12/2023 with an implied volatility of the Euro Stoxx 50 (V2X Index) of 13.57%. At end-2024, the level was higher, at 17.00%. Implied volatility for the S&P 500 (VIX index) was 12.45% at end-2023 and 17.40% at end-2024.

Unit Class C of the Fund closed the 2024 financial year with an increase of 6.51%. The volatility of the price of this unit class during the fiscal year was 5.31%.

Unit Class R of the Fund ended the financial year 2024 up 6.10%. The volatility of the price of this unit class during the financial year was 5.32%.

#### Significant risks:

The main types of risk assumed by the fund during the reporting period were as follows:

- Market price risk: Fund unit volatility over the financial year was 5.31%. This figure was significantly lower than that of the major stock indices (Euro Stoxx 50 and S&P 500), the historical volatilities of which were 18.82% and 17.86% respectively.
- Address default risks: The underlying portfolio of the special fund invested primarily in short-dated, EUR-denominated covered bonds with high credit ratings and liquidity. The focus was on German mortgage bonds (Pfandbriefe). By trading exclusively in exchange-traded derivatives, the default risk is virtually eliminated.
- Interest rate risk: Since the underlying investment consisted solely of short-term EUR bonds with a maximum maturity of four years, the interest rate risk was low. The overall duration of the fund was generally maintained between 0.35 and 1.0.
- Liquidity risk: The fund invested mainly in covered bonds with a minimum issue volume of EUR 500 million. Sales via the bond market were possible at any time. Traded derivatives were listed exclusively on a stock exchange. The liquidity risk was therefore low.
- Currency risk: The fund may only hold bonds denominated in euros. There is therefore only a minor currency risk from the use of derivatives.
- Operational risk: In principle, the fund is exposed to operational risks in the processes of the management company, but did not report any increased operational risk during the reporting period.

#### Information on the asset valuation method

#### Additional information pursuant to § 16 (1) (2) of the KARBV - Information about the valuation method

Valuation is done by the management company. The management company generally relies on external sources for this purpose.

If no trading prices are available, valuation models are used to determine prices (i.e., derived fair values) that are agreed between the custodian and the management company and are based as much as possible on market parameters. This procedure is subject to a permanent control process. Price information from third parties is checked for plausibility by other price sources, model invoices or by other appropriate procedures.

In the case of assets that are admitted to trading on a stock exchange or another organised market or are included in such a market, in accordance with § 27 KARBV the last available trading price is used to ensure the reliability of the valuation. For assets that are neither admitted to trading on a stock exchange or any other organised market nor included in such a market, or for which no tradable price is available, the market values determined by careful assessment using appropriate valuation models and taking into account current market conditions shall be used in accordance with §28 KARBV in conjunction with §168 (3) KAGB. Underlying fair value may also be determined and communicated by an issuer, counterparty or other third party. If so, such a value is checked for plausibility by the management company or custodian, and this plausibility check is documented. Units in domestic investment funds, EU investment units and foreign investment units are valued at their last determined redemption price or at a current price pursuant to § 27 (1) KARBV. If current values are not available, the value of the shares is determined in accordance with § 28 KARBV; this is indicated in the annual report. Bank deposits are valued at their nominal value plus accrued interest. Fixed-term deposits are valued at market values. Liabilities are recognised at their repayment amount.

The investments shown in this report are valued at tradeable stock exchange or market prices for 90.20% of the fund assets and at derived market values for 0.00% of the fund assets. The remaining 9.8% of the fund assets consist of other assets, other liabilities and cash.

#### Information on transparency and the total expense ratio

The total expense ratio expresses all charges and payments borne by the fund during the year. (excluding transaction charges) in relation to the average net asset value of the fund; it must be shown as a percentage.

#### Transaction charges (total of incidental acquisition charges plus selling charges)

Other information required for an understanding of the report

The net change in unrealised gains and losses is determined by comparing the asset valuations that underlie a unit price in each financial year with their historical acquisition costs, with positive differences adding to total unrealised gains and negative differences adding to total unrealised losses, so that by comparing position totals at the end of the financial year with position totals at the beginning of the financial year the net change is obtained.

#### Information on staff remuneration

#### Lupus alpha Group remuneration policy

#### Management company's remuneration system

Explanation of net change in unrealised gains and losses:

Lupus alpha Investment GmbH is a subsidiary of Lupus alpha Asset Management AG. Lupus alpha (which means "alpha wolf") is an owner-operated, independent asset management group that offers specialist investment products to institutional and private investors. We focus on a few, attractive asset classes that require special expertise and in which we can achieve sustainable added value for our customers. We focus on European small caps and on offering alternative solutions. As a special provider, we routinely offer institutional investors access to new sources of alpha through specialised, innovative strategies and to ways of broadening and deepening the overall diversification of their portfolios.

Lupus alpha's partnership-based corporate structure creates the conditions for the highest possible level of staff continuity at management level. By acting as a specialist provider and by focusing its own investments on liquid investments, we ensure control over the usual risks of a medium-sized asset manager.

Performance-related and entrepreneurial-oriented remuneration for employees is a central component in the design of Lupus alpha's compensation packages. Through comprehensive compensation packages, management intends to support medium- to long-term corporate goals set within the strategy-finding process. All requirements are met from the Ordinance on Supervisory Requirements for Institutional Compensation (InstitutsVergV), Articles 13 and 22 of Directive 2011/61/EU of the European Parliament and Council of 8 June 2011 on Alternative Investment Fund Managers (AIFM Directive), the guidelines for sound compensation policies based on the AIFMD (the German translation of the ESMA guidelines) and Annex II of the remuneration policy of the AIFM directive.

#### Results of the annual review of the remuneration policy

Lupus alpha regularly reviews the appropriateness of the remuneration concept with the involvement of compliance and makes adjustments if necessary. The remuneration policy and its application are also subject to review by the internal audit department and monitoring by the Supervisory Board.

There were no complaints.

326.939.16 EUR

#### Significant changes to the established remuneration policy

There were no significant changes to the remuneration system in the reporting period.

#### Total amount of employee compensation paid to the management company in 2023: EUR 5.9 million:

o/w fixed pay (%) 62.25%

o/w variable pay (%) 37.75%

Remuneration paid directly out of the fund in EUR million 0.00

Total employees incl. management 96

Total remuneration paid by the management company to risk takers in the financial year just ended: EUR 1.29 million:

o/w indirectly via cost allocation by the parent company to senior management: EUR 1.29 million

#### Information for institutional investors pursuant to §101(2)(5) KAGB, together with §134c(4) AktG

#### Information on medium to long-term risks

Information on the medium to long-term risks of the investment fund is provided in the activity report.

#### Portfolio composition, portfolio turnover and portfolio turnover expenses

Information regarding the composition of the portfolio, portfolio turnover and portfolio turnover costs is provided in the annual report in the sections "Statement of net assets", "Transactions completed during the reporting period, not included in the statement of net assets", and "Information on transparency and the total expense ratio".

#### Consideration of the medium to long-term development of the management company in the investment decision

Shares traded on a regulated market are subject to various medium and long-term risks.

The assessment of these risks is a fundamental part of the investment strategy and policy.

The description of whether or how the medium to long-term development of the management company is taken into account in the investment decision is made in the activity report.

#### Use of proxies

Information on exercising voting rights is available on the Lupus alpha Asset Management AG website under the strategies for exercising voting rights.

#### Handling securities lending and dealing with conflicts of interest in the context of participation in companies, in particular through the use of shareholder rights

No securities lending transactions were concluded for the fund during the reporting period.

Information on the handling of conflicts of interest is available on the Lupus alpha Asset Management AG website.

#### Report of the independent auditor

To Lupus alpha Investment GmbH, Frankfurt am Main

#### **Audit opinion**

We have audited the annual report of the Lupus alpha Volatility Risk-Premium fund – consisting of the activity report for the fiscal year from 1 January 2024 to 31 December 2024, the overview of assets and the statement of net assets on 31 December 2024, the profit and loss account, the statement of appropriation of income, the statement of changes in fund assets for the fiscal year from 1 January 2024 to 31 December 2024, as well as the comparative three-year overview, the statement of transactions completed during the reporting period not included in the statement of net assets, and the notes.

We did not take the items of the annual report mentioned in the "Other Information" section of our audit report into account when forming our audit opinion, in accordance with German legal regulations.

In our opinion, based on our audit, the accompanying annual report complies, in all material respects, with the provisions of the German Investment Code (Kapitalanlagesetzbuch – KAGB) and presents a comprehensive and true picture of the position and developments of the investment fund in compliance with these provisions. Our audit opinion on the annual report does not include the content of the parts of the annual report specified in the "Other Information" section.

#### Basis for the audit opinion

We conducted our audit of the annual report in accordance with § 102 KAGB, considering German generally accepted auditing standards determined by the Institut der Wirtschaftsprüfer [Institute of Public Auditors in Germany] (IDW). Our responsibility under these provisions and standards is described in more detail in the section "Responsibility of the auditor for the audit of the annual report" of our report. We are independent of Lupus alpha Investment GmbH in accordance with German commercial law and the professional rules and regulations, and have fulfilled our other German professional duties in accordance with these requirements. We believe that the audit evidence we have obtained is suitable and sufficient to serve as a basis for our audit opinion of the annual report.

#### Other information

The legal representatives are responsible for the other information. The other information includes the following components of the annual report:

• the information in the annual report that is indicated as not being included in the audit opinion.

Our audit opinion on the annual report does not include the other information, and we are not providing an audit opinion nor any other form of audit assurance in this audit report on such information.

In connection with our audit, we have responsibility for reading the other information specified above and evaluating whether the other information

- contains material inconsistencies with the components of the annual report covered by the audit opinion or the knowledge obtained during the course of the audit or
- otherwise appears to be incorrectly presented.

#### Responsibility of the legal representatives for the annual report

The legal representatives of Lupus alpha Investment GmbH are responsible for preparing the annual report, which is compliant in all regards with the provisions of the KAGB, as well as for ensuring that the annual report presents a comprehensive and true picture of the position and developments of the investment fund, in compliance with these provisions.

Furthermore, the legal representatives are responsible for the internal controls they have deemed necessary under these provisions in order to ensure that the annual report is free of material misstatement, whether due to fraud or error (i.e. fraudulent financial reporting and misappropriation).

In preparing the annual report, the legal representatives are responsible for including in the report such events, decisions and factors that may materially affect the future growth of the investment fund. This means that in preparing the annual report, the legal representatives must assess Lupus alpha Investment GmbH's operation of the investment fund as a going concern and are responsible for disclosing facts concerning the continuation of the investment fund, if applicable.

#### Responsibility of the auditor for the audit of the annual report

Our aim is to obtain reasonable assurance that the annual report as a whole is free of material misstatement, whether due to fraud or error, and to issue a report containing our audit opinion on the annual report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted pursuant to § 102 KAGB, in accordance with German Generally Accepted Standards for Financial Statement Audits issue by the Institut der Wirtschaftsprüfer (IDW) will always detect a material misstatement. Misstatements may be due to fraud or error and are considered material when it may reasonably be expected that these, individually or as a whole, could influence economic decisions of users made on the basis of this annual report.

During the audit, we exercise professional judgement and adopt a critical stance. Furthermore:

- We identify and assess the risk of material misstatements in the annual report due to fraud or error, plan and carry out audit procedures in response to these risks, and obtain sufficient and appropriate audit evidence to provide a basis for our audit opinion. The risk that material misstatements due to fraud will not be detected is higher than the risk that material misstatements due to error will not be detected, as fraud may involve collusion, forgery, intentional omissions, misleading representations, or bypassing of internal controls.
- We obtain an understanding of internal controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the fund's internal controls.
- We assess the appropriateness of the account methods used by the legal representatives of Lupus alpha Investment GmbH in preparing the annual report and the justifiability of the estimated values presented by the legal representatives and related information.
- On the basis of the audit evidence obtained, we reach a conclusion as to whether a material uncertainty exists in connection with events or circumstances that could raise serious doubt about Lupus alpha Investment GmbH's operation of the investment fund as a going concern. If we conclude that a material uncertainty exists, we are obliged to draw attention in our report to the relevant information in the annual report or, if such information is inadequate, to amend our audit opinion. We draw our conclusion on the basis of the audit evidence obtained up until the date of our report. Future events or circumstances may nevertheless result in Lupus alpha Investment GmbH's discontinuation of the investment fund.
- We assess the overall presentation, structure and content of the annual report, including figures and whether the annual report presents the underlying transactions and events in such a way that the annual report, in compliance with KAGB, presents a picture of the fund's actual circumstances and performances.

Among other things, we consult with those parties responsible for monitoring the planned scope and timing of the audit and significant audit findings, including any deficiencies in the internal control system that we identify during our audit.

#### Lupus alpha Volatility Risk-Premium annual report

#### Other information - not included in the audit opinion on the annual report

Information pursuant to Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector

The most important principal adverse impacts (PAIs) on sustainability factors are taken into account in the investment process at the company level. As there is no binding requirement to consider PAIs on the fund level, this was not done.

This fund has not been classified as a product that promotes environmental or social characteristics as defined by the Disclosure Regulation (Article 8), nor as a product with the objective of sustainable investment (Article 9). The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Disclosures pursuant to Regulation (EU) 2015/2365 on transparency of securities financing transactions (SFTR) and of reuse and amending Regulation (EU) No 648/2012 - Disclosure according to Section A

During the reporting period, there were no securities financing transactions pursuant to the aforementioned legal provision.
