This PRIIP is authorised in Germany.

Lupus alpha Investment GmbH is authorised in Germany and regulated by Bundesanstalt für Finanzdienstleistungsaufsicht.

Document of production: 16 April 2026

## What is this product?

### Type

The fund is a UCITS investment fund issued in Germany.

### Term

The fund has an indefinite term. The company is entitled to terminate the management of the fund subject to a notice period of six months by way of an announcement in the Federal Gazette and furthermore in its annual or half-yearly report. Information on redemption options can be found in the section "How long should I hold the investment and can I withdraw money prematurely?".

### Objective

The fund has no specific investment focus. The fund management aims to participate in the performance of global equity markets using a dynamic derivatives strategy. The equity portion is represented by the buying and selling of exchange-traded derivatives. This results in an asymmetric risk/return profile. The fund management's investment policy aims to achieve risk-appropriate capital appreciation. To this end, depending on the assessment of the economic and capital market situation, assets permitted under the German Investment Code (KAGB) and the fund's terms and conditions are acquired and sold within the framework of the investment policy. Income and capital gains may be distributed.

### Intended Retail Investor

The fund is aimed at all types of investors pursuing the goal of asset accumulation or asset optimisation and who wish to invest on a medium-term basis. They should be in a position to bear losses up to the amount of the capital they have invested. This fund is a product for customers with a basic knowledge of, and experience with, financial products.

## What are the risks and what could I get in return?

### Risk Indicator

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

### Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 3 years Investment: 10,000 EUR			
Scenarios		If you exit after 1 year	If you exit after 3 years
<b>Minimum</b>	There is no minimum guaranteed return. You could lose some or all of your investment.		
<b>Stress</b>	What you might get back after costs	5,110 EUR	4,850 EUR
	Average return each year	-48.90%	-21.40%
<b>Unfavourable</b>	What you might get back after costs	7,860 EUR	9,590 EUR
	Average return each year	-21.40%	-1.40%
<b>Moderate</b>	What you might get back after costs	10,620 EUR	12,200 EUR
	Average return each year	6.20%	6.90%
<b>Favourable</b>	What you might get back after costs	14,300 EUR	16,630 EUR
	Average return each year	43.00%	18.50%

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: This type of scenario occurred for an investment between April 2017 and March 2020.

Moderate: This type of scenario occurred for an investment between October 2021 and September 2024.

Favourable: This type of scenario occurred for an investment between January 2019 and December 2021.

## What happens if Lupus alpha Investment GmbH is unable to pay out?

The failure of the company will have no direct effect on your redemption, as the statutory regulation provides that in the event of the insolvency of the financial investment management company, the investment fund will not become part of the assets of the insolvency estate, but will be administered independently.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested.

	If you exit after 1 year	If you exit after 3 years
<b>Total costs</b>	515 EUR	871 EUR
<b>Annual cost impact(*)</b>	5.1%	2.5%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 9.3% before costs and 6.9% after costs.

### Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
<b>Entry costs</b>	4.0% of the amount you pay in when entering this investment. This is the most you will be charged. The person selling you the product will inform you of the actual charge.	400 EUR
<b>Exit costs</b>	We do not charge an exit fee for this product, but the person selling you the product may do so.	0 EUR
Ongoing costs taken each year		
<b>Management fees and other administrative or operating costs</b>	0.9% of the value of your investment per year. This is an estimate based on actual costs over the last year.	112 EUR
<b>Transaction costs</b>	0.0% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	2 EUR
Incidental costs taken under specific conditions		
<b>Performance fees</b>	There is no performance fee for this product.	0 EUR

---

## How long should I hold it and can I take money out early?

### Recommended holding period: 3 years

This product is suitable for investments over at least the medium term. As a rule, shares in the fund may be redeemed each day of valuation. No costs or fees will be incurred for such a transaction.

In order to manage liquidity risks, the Company may restrict the redemption of units if investors' redemption requests reach a pre-determined threshold beyond which such requests can no longer be met in the best interests of all investors. Furthermore, the Company may extend the redemption period if redemption requests can no longer be met in the best interests of all investors.

---
